Maintain air concentrations below occupational exposure standards. Ensure adequate ventilation, especially in confined areas.

| Personal protective equipmer | ıt |
|------------------------------|--|
| Eye/face protection | Safety glasses with side-shields conforming to EN166 Eye wash bottle with pure water |
| Hand protection | Chemical-resistant, impervious gloves complying with an approved standard must be worn at all times when handling chemical products. Reference number EN 374. Follow manufacturer specifications. Recommended: Butyl rubber/nitrile rubber gloves. Contaminated gloves should be removed. |
| Skip and hady protection | Duct imporvious protective quit |
| Skin and body protection | Dust impervious protective suit Protective clothing (e.g. Safety shoes acc. to EN ISO 20345, long-sleeved working clothing, long trousers). Rubber aprons and protective boots are additionaly recommended for mixing and stirring work. |
| Respiratory protection | In case of inadequate ventilation wear respiratory protection. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe work- ing limits of the selected respirator. particulate filter P |
| | P1: Inert material; P2, P3: hazardous substances |
| | Ensure adequate ventilation. This can be achieved by local exhaust extraction or by general ventilation. (EN 689 - Meth- |
| | ods for determining inhalation exposure). This applies in par- |
| | ticular to the mixing / stirring area. In case this is not sufficent to keep the concentrations under the occupational exposure |
| | limits then respiration protection measures must be used. |
